Rancho Tres Hijos has an all natural deer herd with no introduction of outside genetics and does not provide supplemental bulk protein feed to the deer herd. Only natural forbs and shrubs on the ranch provide food for the deer except corn at feeders during the hunting seasons. Oats are planted in the fall for the cattle program and these are also grazed by the deer.

HUNTING SEASON - MANAGED LAND PROGRAM - Rancho Tres Hijos participates in the Texas Parks and Wildlife Managed Land Program. White Tailed Deer may usually be hunted from October though February under this program. Contact the Ranch for exact dates.
